

Ilham

West Sumatra, Indonesia | [LinkedIn](#) | [Github](#) | +628984828899 | ilhmoxy@gmail.com

Software Engineer specializing in website and mobile development and full-stack web technologies, with expertise in Kotlin, Java, React, and Node.js. Experienced in designing, architecting, and deploying business-critical systems, such as Point-of-Sale (POS), Enterprise Resource Planning (ERP), HRIS, and Loyalty Platforms, etc. Proven ability to translate complex requirements into efficient, scalable digital solutions, with a strong emphasis on system integration and database management. A highly adaptive professional who thrives in collaborative environments, committed to delivering seamless and high-quality user experiences through collective team excellence.

EDUCATION

Andalas University

BE in Computer Engineering (GPA : 3.56/4.00)

- Awards: Distinguished Student Activist

Padang, West Sumatra, Indonesia

August 2021 – July 2025

EXPERIENCE

Alturian Indonesia

Software Engineering

- Developed and maintained robust full-stack applications, utilizing Angular and React for dynamic front-end interfaces and Laravel for scalable back-end services.
- Engineered core modules for enterprise-grade systems, including Point-of-Sale (POS), ERP, HRIS, and Loyalty Platforms, ensuring seamless business logic integration.
- Optimized application performance by implementing efficient database management and streamlining API communication between front-end and back-end systems.
- Collaborated effectively within a cross-functional team, participating in technical discussions to translate complex business requirements into high-quality digital solutions.
- Managed version control and streamlined development workflows using Git, ensuring code integrity and efficient team collaboration.

South Jakarta, Indonesia

November 2025 – Now

Neo Telemetri

System Engineering

- Consistently delivered all web project requirements on schedule, maintaining a 100% on-time completion rate despite multiple client-requested revisions.
- Initiated and delivered a project as Frontend Developer, the BAKTI Universitas Andalas website, designed as an integrated platform for new students during the orientation program to access information, record attendance, and submit assignments by utilizing the Blade templating engine from the Laravel framework.
- Performed functional and regression testing for SIPENJARU (Room Loan Information System), ensuring smooth and error-free room booking management for the PKM building at Andalas University.
- Developed the Aksi Hijau App using Flutter, designed to promote environmental awareness and green initiatives, and successfully showcased the project in a hackathon competition.
- Guided new recruits in understanding system engineering concepts through an updated syllabus and engaging hands-on sessions.
- Facilitated cross-functional collaboration with diverse stakeholders and contributed to multiple committees to drive organizational initiatives.

Padang, West Sumatra, Indonesia

August 2022 – September 2024

CV Putra Anugrah Mandiri

Internship Trainee as Backend Developer

- Explored and deepened knowledge in Laravel framework, focusing on MVC architecture, authentication, and database management
- Built and implemented a letter disposition system using Laravel backend, improving document management efficiency

Padang, West Sumatra, Indonesia

January 2024 – February 2024

Bangkit Academy 2024 Batch 2 by Google, GoTo, Traveloka

Mobile Development Learning Path Student

Online

August 2023 – January 2024

- Developed an Android application in collaboration with a team to detect hoaxes using Machine Learning (NLP), enhancing media literacy by allowing users to analyze text or news links for authenticity
- Distinguished as one of the Top 50 Capstone Projects out of 700+ teams in Bangkit Academy 2024 Batch 2
- Earned multiple Android development certifications and strengthened soft skills such as time management and project management.

ACHIEVEMENTS

1st Place – Hackathon Competition 2023, hosted by CyberTech PNP **Padang, West Sumatra, Indonesia** *November 2023*

- Developed the “Aksi Hijau” App using Flutter under the hackathon theme “*Building Communities Through Digital Solutions*”, connecting environmental volunteers with communities to organize and execute cleanup initiatives..
- Built as a responsive, cross-platform application (Android & iOS), ensuring seamless accessibility and user experience across devices, while integrating features such as volunteer registration, event coordination, and real-time notifications.

Silver Medal – Innovation Social Science Category at World Invention Competition and Exhibition(WICE) **Padang, West Sumatra, Indonesia** *September 2024*

- Participated in the innovation of “Aksi Hijau” App, developed using Flutter, designed to connect environmental volunteers with communities in organizing and executing cleanup activities.

1st Place – Hackathon Competition 2024, hosted by CyberTech PNP **Padang, West Sumatra, Indonesia** *December 2024*

- Led a team in “E-Government: Enhancing Public Access and Efficiency” themed competition, developing “Garuda App,” an Android-based platform designed to bridge communication between government and citizens, integrating AI to enhance transparency and foster more open governance.
- Integrated the application with the backend system, ensuring responsive design across devices and incorporating a chatbot feature to improve user interaction and accessibility.

Top 50 Capstone Project – Bangkit Academy 2024 Batch 2 **Padang, West Sumatra, Indonesia** *January 2025*

- Developed “HOFE”, an Android application built with Kotlin using the MVVM architecture, designed to detect hoaxes by integrating Natural Language Processing (NLP) models with support for both news links and text-based inputs.
- Implemented modern Android development practices with Kotlin, including Repository pattern, ViewModel, LiveData/Flow, and Retrofit integration, to ensure clean, scalable, and maintainable code architecture.

SKILLS & INTERESTS

Hard Skills:

HTML5, CSS3, PHP, Laravel, Node.js, React.js, Angular.js, Next.js, Flutter, Android Native Development(Kotlin/Java), RESTful API, MySQL, Git

Soft Skills:

Problem Solving, Team Collaboration, Adaptability, Time Management, Communication, Continuous Learning

Interests:

Android Development, Web Development (Frontend & Backend), and AI Technology
